

White Label Cloud Infrastructure (IaaS)

For today's growing business, deploying a scalable cloud solution is imperative. Resource needs can change rapidly, so it's important that your cloud-based infrastructure grows in accordance with the growth of your clients' needs. With the ability to add and remove computing resources on an ongoing basis, you'll always have the flexibility to offer customized solutions to your clients when you partner with AwesomeCloud.

Cloud Servers

Cloud Servers are an ideal way for your organization to offer cloud computing solutions to each of your clients without the overhead of building your own internal cloud infrastructure. Benefits include:

- ✓ Reliability & Performance
- ✓ Convenience & Security
- ✓ Customization & Scalability
- ✓ Optional Dedicated Servers
- ✓ High Availability
- ✓ Automatic Failover
- ✓ Live Migrations
- ✓ NIC Teaming
- ✓ Scalability

Microsoft Powered Cloud

AwesomeCloud's virtualization and cloud infrastructure is powered by Microsoft cloud technologies. These technologies enable your organization to deliver white label cloud solutions to each of your clients.

- ✓ Windows Server 2012 R2
- ✓ Hyper-V Virtualization
- ✓ System Center 2012 R2

Double Take Software

Network Solutions

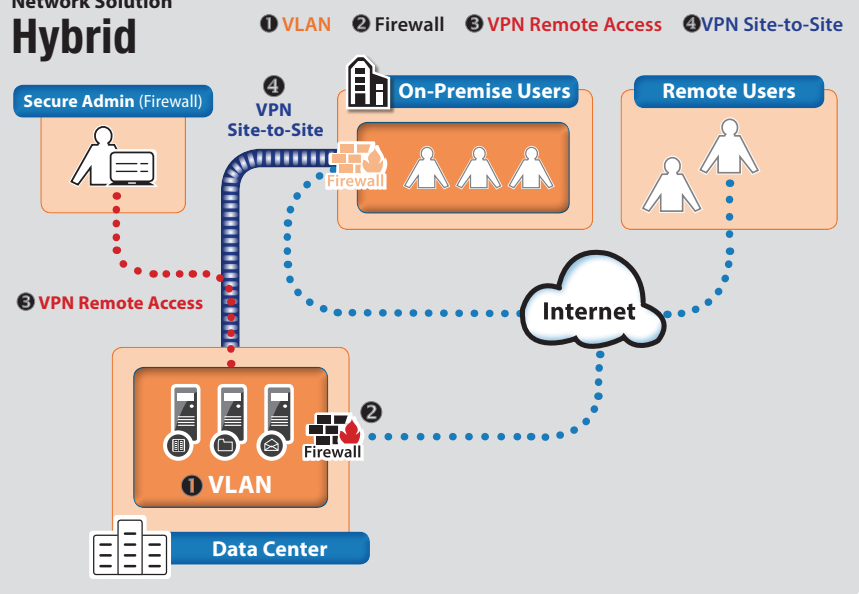

AwesomeCloud provides a full array of network solutions designed to ensure that the cloud-based solutions you offer to your clients can be easily integrated with existing on-premise services. Solutions include:

- ✓ Site-to-Site VPNs
- ✓ Remote User VPNs
- ✓ Firewalling
- ✓ Virtual Lans (VLAN)
- ✓ Unified Threat Management (UTM)

Network Solution Cloud Only

Network Solution Hybrid

Our Partners Say it Best

“AwesomeCloud has been ‘awesome’ for us. We use them for all of our internal server needs and recommend them as our cloud hosting partner for our customers. The transitions have been a net benefit. They are responsive to our needs. Their up-time and speed are both excellent.”

Bill G. —CTO, Managed Services Provider in Montana
